March to the US Embassy

The NATO bombing has made the situation in the Balkans worse. Scores of civilians have been murdered.

Thousands of refugees have been driven out of their country. Even television stations have been bombed so that the generals can hide the reality of war.

The No to War Campaign opposes Milosevic. His regime has been involved in ethnic cleansing and the suppression of democratic rights. But NATO bombs have only united the population behind him.

Each Cruise missile costs £1 million. Each B-2 Stealth bomber costs £1.5 billion. If the money that was used in this war was used to eliminate disease and famine, the world would be a far better place.

The generals and the war-mongers can be stopped if there is a powerful anti-war movement throughout Europe. Already hundreds of thousands have marched in Italy, Greece and Germany.

This demonstration to the US embassy will be a major national demonstration.
